5 The Paddock, Bluntisham PE28 3NR. TPO (8130-Carter)

Identification of Trees and proposed work:

T1 Lime to right of back garden:
remove epicormic growth from main stem, up to first fork at 6m
reduce crown by approx 2m
Reason: to improve light levels in house and garden. Note that the tree has grown significantly since the owner purchased the property. A precedent has also been set by the heavy reduction work carried out to the neighbouring tree, although we are proposing a much more sympathetic reduction.

T2 Lime:
remove epicormic growth from main stem up to 6m
Reason: to improve light levels in house and garden. Please note that this work was previously approved however not carried out
