Dear Carly

Re: Trees at the above address

Please find below my Report for the work discussed when visited on 17/02/2025

Tree 1) Downy Hawthorn
To remove to ground level - the tree has severe rot at the base which potentially may cause the tree to fail and break over footpath / zebra crossing or company car park.

Tree 2) Yew
To prune branches back to previous pruning points between 50cm and 1m in places where needed, pulling tree back into a good, rounded shape. Prune branches away from BT cable.

Tree 3) Yew
Raise whole canopy to 2.4m from ground lifting away from car parking spaces. Prune whole crown back to shape by 1m in places, mainly over car parking side of tree, leaving tree in a good rounded shape.

Many thanks

Tim Moser
