Introduction

The Environment Act 1995 has made site sensitivity a key issue, as the legislation pays as much attention to the pathways by which contamination could spread, and to the vulnerable targets of contamination, as it does the potential sources of contamination.
For this reason, Landmark's Site Sensitivity maps and Datasheet(s) place great emphasis on statutory data provided by the Environment Agency/Natural Resources Wales and the Scottish Environment Protection Agency; it also incorporates data from Natural England (and the Scottish and Welsh equivalents) and Local Authorities; and highlights hydrogeological features required by environmental and geotechnical consultants. It does not include any information concerning past uses of land. The datasheet is produced by querying the Landmark database to a distance defined by the client from a site boundary provided by the client.
In this datasheet the National Grid References (NGRs) are rounded to the nearest 10m in accordance with Landmark's agreements with a number of Data Suppliers.

Radon Potential dataset Copyright Notice

Information supplied from a joint dataset compiled by The British Geological Survey and Public Health England. The probability result is only valid for properties above ground. All basement and cellar areas are considered to be at additional risk from high radon levels. If an underground room such as a cellar or basement makes up part of the living or working accommodation, the property should be tested regardless of Radon Affected Area status.

APPENDIX F

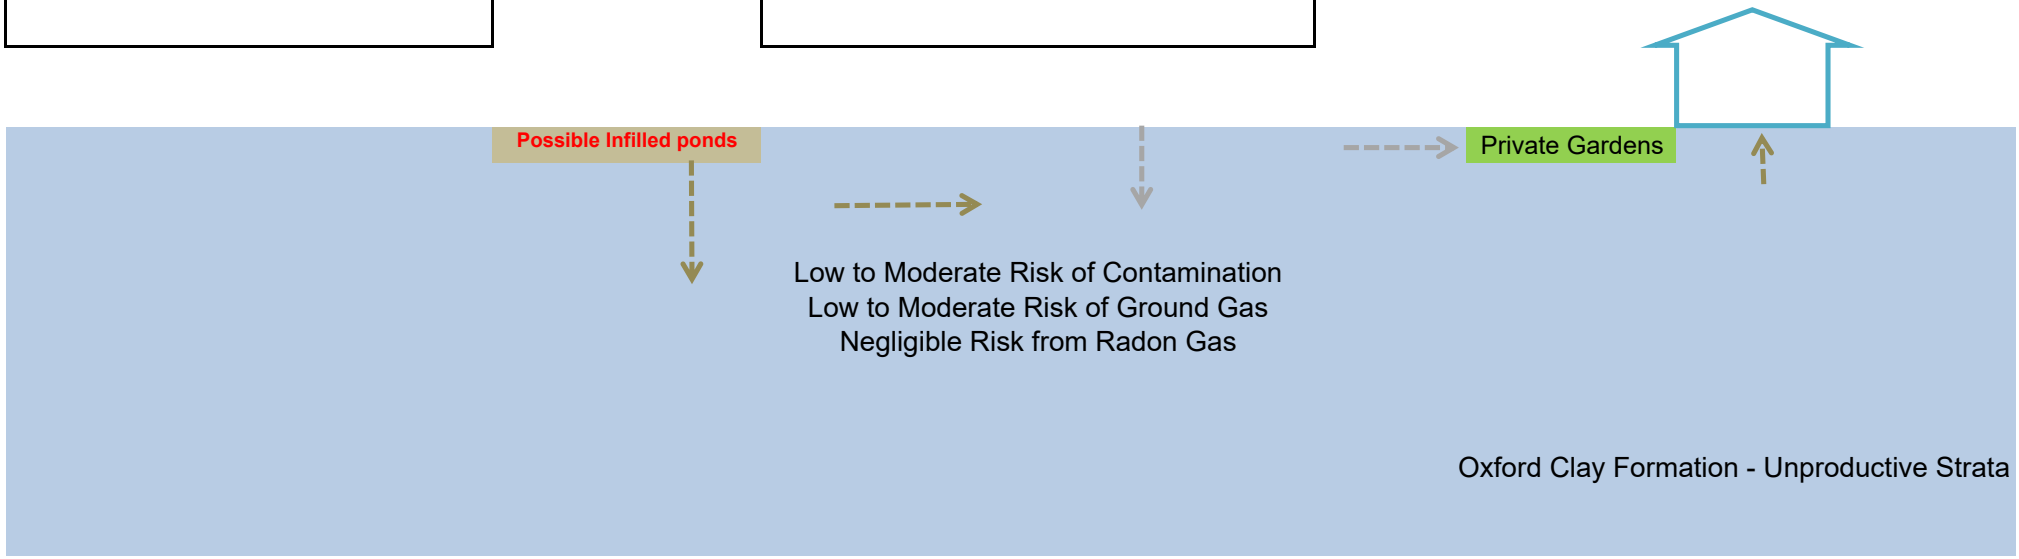

Conceptual Model Cross Section

CONCEPTUAL CONTAMINATION GROUND MODEL

Offsite Potential Sources -
Current: Nearby large above ground diesel tanks; Agricultural land use of the surrounding area; **Historical:** Agricultural land use of the surrounding area; Infilled ponds

Onsite Potential Sources -
Current: Agricultural land use of the subject site including chemical store; Existing buildings on site; Made Ground underlying the site; **Historical:** Agricultural land use of the subject site including chemical store

Proposed Residential Development

Potential Direct Contact or ingestion pathway	
Potential Groundwater or Leachate migration pathway - Not used	
Potential Hydrocarbon vapour, Ground gas and Radon pathway
