Subject: Land North of 76 Owl End, Great Stukeley. Planning Application
Date: 10 May 2025 22:02:48

Customer objects to the Planning Application

We object to the Planning Application for the following reasons:

Traffic generation
Owl End is a poorly maintained single track road without passing spaces. There are areas where there are blocked sight lines for drivers and pedestrians alike. Increased traffic generated by further housing will inevitably exacerbate this situation and potentially be dangerous.

Environmental impact
This area provides a habitat for protected trees, owls, bats and foxes which are already being disturbed by the extension of the Alconbury Weald development.

Lack of need
There is already an enormous estate being developed at Alconbury Weald and an increase in new housing along Green End. Surely this negates the need to change the use of this land for further housing in this area.

I thank you for your consideration.
