Biodiversity

- BAT
  - 2 x bat tubes should be mounted minimum two metres up a tree or a wall.
  - Face the box North or South.
  - Bat houses work best with at least 6-8 hours of direct sunlight (if only partial day sun is available- morning sun is preferable).
- RDB SB
  - 2 x Robin boxes and 2 x Songbird should be fixed minimum two metres up a tree or a wall.
  - Face the box between north to east, thus avoiding strong sunlight and the wettest winds.
  - Make sure that the birds have a clear flight path to the nest without any clutter directly in front of the entrance. Tilt the box forward slightly so that any driving rain will hit the roof and bounce clear.
- BEE
  - Bee nest box to facing south
- INS
  - Insect house to back garden
