TO WHOM IT MAY CONCERN

Dear Sir/Madam

Re: [redacted]

Diagnosis

[redacted]

Medication

[redacted]

[redacted] is receiving treatment and care from our Neurology department for his [redacted]

Due to his condition he sometimes requires help with potential falls,.all daily activities including showering and meal preparation as well as an overview over his medication. He also needs home modifications including grab rails and accessibility built into house.

I understand that it is his wish to maintain as much independence as possible for as long as possible and with that in mind he is planning on living in an annexe adjacent to his daughter so that she is able to provide the support needed in a timely manner whilst allowing him the dignity and independence of having his own room.

If you have further questions please don't hesitate to get in touch by email or by phone.

Yours faithfully

Electronically approved by Claire Rudwick
