Dear Angel

Re: Priory Planning condition Point 22 Gas Easements

As you requested we have reviewed the Caden Gas Network Ltd apparatus in respect to the proposed construction works for the Priory all as shown and describer on AOC drawings and documentation.

Our findings based on the searches undertaken by Groundsure under their enquiry reference GRS14306 DBYD and the response received from Caden Gas Network Ltd Plant Protection Teams is that the proposed works do not impact on the Cadents assets currently installed within the site boundary.

Please let me know if you need anything further.

Yours sincerely

[redacted]
