TPO Application - 64 High Street, Hail Weston

Description - Emergency removal of TPO tree (004/79) that had partly fallen during recent storms. Under consultation with a professional tree surgery company (Eastern Tree Surgery) recommendation was to remove the tree. Previous works had been completed to the tree under a previous submission when the tree then had been identified as having a condition that was identified as being terminal - therefore any works thereafter would be to reduce the tree.

Failure to remove the tree would have potential disastrous consequences as the remainder of the tree could have fallen onto the listed building.
