Flood risk assessment

New garage – the Poplars Farcet

Proposal :

New building 157m2 with the demolition of 2 existing buildings of 60m2 , all construction is within the existing hard standing of the site and non permeable areas are not affected

The areas are not domestic living areas and are for private garage , workshop and small office area

Any electrics will be at high level

Drainage will be from the existing garage which is connected to the dwelling surface water system
