RE: Application description

Proposal: Erection of reverse vending machine unit for recycling purposes and associated works

Site address: 4 Edison Bell Way Huntingdon PE29 3HG

Recommendation: No Objection
The Highway Authority has reviewed the submitted details in respect of the proposed erection of a reverse vending machine unit within the existing Aldi store car park. The proposal would result in the loss of three parent and child parking spaces; however, this represents a limited reduction in parking provision and there is no evidence that the development would result in severe parking displacement or have an adverse impact upon the safe operation of the site.

The development is ancillary to the existing retail use and is not anticipated to generate a material increase in vehicular traffic. The submitted information indicates that servicing of the facility will be undertaken by existing store staff and that collection of materials will occur as part of existing store servicing arrangements, with no requirement for additional servicing vehicles.

Subject to the development being carried out in accordance with the submitted plans, the Highway Authority considers that the proposal would not have an unacceptable impact upon highway safety and would not result in a severe cumulative impact on the road network.
