Morning Charlotte

I am awaiting the amended details as per the Urban Design Officer's comment and should have them later today.

In terms of the EHO comments I can confirm that the kitchen to be installed will not be a commercial kitchen. There will be no fryers and commercial ovens and grills. A domestic sized oven and hob will be installed with two sinks, a dishwasher and a domestic sized fridge. There will be no large-scale food preparation and cooking on site. Something similar to the kitchen shown in the photo below.

Regards
David
