109 High Street, Brampton PE28 4TQ (8592/J400 Breakspear) CA

Identification of Trees and proposed work:

T1 Atlas Cedar: reduce southern and eastern sides by 3m
Reason: to reduce the high volume of bird excrement left on the driveway and to reduce the overhang into neighbouring garden
Completed work will largely not be noticeable from the High St so will have a negligible effect on the appearance and amenity value of the tree
