Bunded Tank

10 Year Manufacturers Warranty

Watchman & Bottom Outlet Kit Included

TUFFA 2300SBFP-002

2300 Litre Steel Bunded Heating Oil Tank is complete with an inner tank and bund to provide ultimate protection against leaks, spillages and overfilling. Built with high-quality mild steel, this oil tank provides a long-term solution for your oil storage needs and is ideal for domestic applications. The Tanks are weather-resistant and offer reliable oil storage for at least 30 years when installed, used and maintained appropriately and come with a 10-year warranty.

s Tuffa's fire protected oil tanks serve as a compliant alternative to traditional fire barriers, the integrally fitted 60 minute fire protection system allows for you to install this oil tank adjacent to buildings or other structures or even inside outbuildings. A minimum of 300m is acceptable unless access is needed (e.g. at the front of the tank to fill it) where a minimum of 600mm is required. This offers a quick and easy solution to replace non-compliant tanks situated within 1.8m of buildings and structures, as well as allowing you to save outdoor space by hiding your tank behind and around outbuildings.

Please note although all Tuffa oil tanks are certified by the Local Authority Building Control (LABC) and prove compliant with Building Regulations in Britain.

Specifications:
- Capacity: 2300 Lt
- Tank Type: 60 Minute Fire Rated Bunded
