Subject: Planning Application Ref: 24/01992/TREE

Good morning,

Ref: **SCHEDULE OF ITEMS REQUIRED (24/01992/TREE)**

In response to your request for further information to support our application for maintenance to our 3 Oak Trees, I am pleased to confirm proposed works advised by our Arborist **as follows….**

T1 Lateral prune to reduce over extended branches on southern side by no more than 3 metres removing excess growth whilst making sure to maintain the tree's natural shape.
On northern side lateral prune by no more than 2 metres to maintain and balance the trees natural shape and prevent contact damage to the corner of the property. Remove dead or diseased
wood.

T2 Lateral prune to reduce over extended branches by a maximum 2 metres to remove excess growth whilst making sure to maintain the tree's natural shape. Remove dead or diseased wood.

T3 Lateral prune to reduce over extended branches by maximum 2 metres to remove excess growth making sure to maintain the tree's natural shape. Remove dead or diseased wood

Focus is on trimming branches that are overgrown weak or diseased, reducing the risk of wound infesting insects and disease transmission and to ensure that sunlight can penetrate through the canopy encouraging healthier growth whilst maintaining the tree's natural shape

Kindest regards

[redacted]

Repton House, Manor Farm Road, Waresley, Cambridgeshire SG19 3BX
