Dear Sir or Madam
With reference to the subject matter planning application and the letter we received stating it may be of interest or relevant to us.
Although we can not see any reason for us objecting to this change of use, realising that children need a place to live, we would like to make the following observations.
What is the age demographic of the children who will be accommodated at the home? Will they be children requiring special needs?
Whatever the answers has Ramsey been properly assessed to ascertain that it can sufficiently meet the needs of young people in a home - ie with no parents/carers to take them to leisure facilities, cinemas, sports venues etc? Ramsey is sadly lacking in these amenities for young people.
As we have enjoyed a quiet and relaxed life and good relationship with our neighbours at 103 Newtown Road since we moved here[redacted], we would not like a change of use to compromise our standard of living. We hope we can have reassurance that the noise level would not be greater than it is now. Also we would not like to see high play equipment installed next to our boundary.
Also an assurance that there would not be future application to increase the size of the existing property in order to accommodate more children.
As long as we can be assured of the above we are sure we will continue with a good relationship with new neighbours.
As we are also owners of 143a Great Whyte [redacted] which we also received a letter, we would ask that our comments, as above, are recorded for that property as well.
Kind regards. Yours sincerely
