Subject: Planning Application Ref: 25/01051/HHFUL

To Whom It May Concern,

Re: Planning Application Ref: 25/01051/HHFUL

I am writing in response to your recent letter regarding regarding the above planning application concerning the property at 22 Wood End.

Due to the close proximity of the proposed works to my back garden, bedroom window and side entrance, I have several concerns regarding potential disturbance during both the demolition of the existing shed and the construction of the new one.

Firstly, I am particularly concerned about the noise and dust that will be generated throughout the process. I have been informed by the residents at No. 22 that the current shed has had a longstanding rodent problem that has not been resolved. The demolition of this structure risks releasing dust contaminated with rodent droppings and chicken excrement, both of which may contain harmful pathogens.

I would request that this health hazard be taken into account when reviewing the application and that appropriate mitigation measures are required, such as ensuring the shed is fully cleared of any infestations and professionally cleaned before demolition begins.

Secondly, the deterioration of the existing shed and its partial collapse towards my boundary walls may have caused damage. I therefore request that particular care is taken during the demolition phase to prevent any further impact.

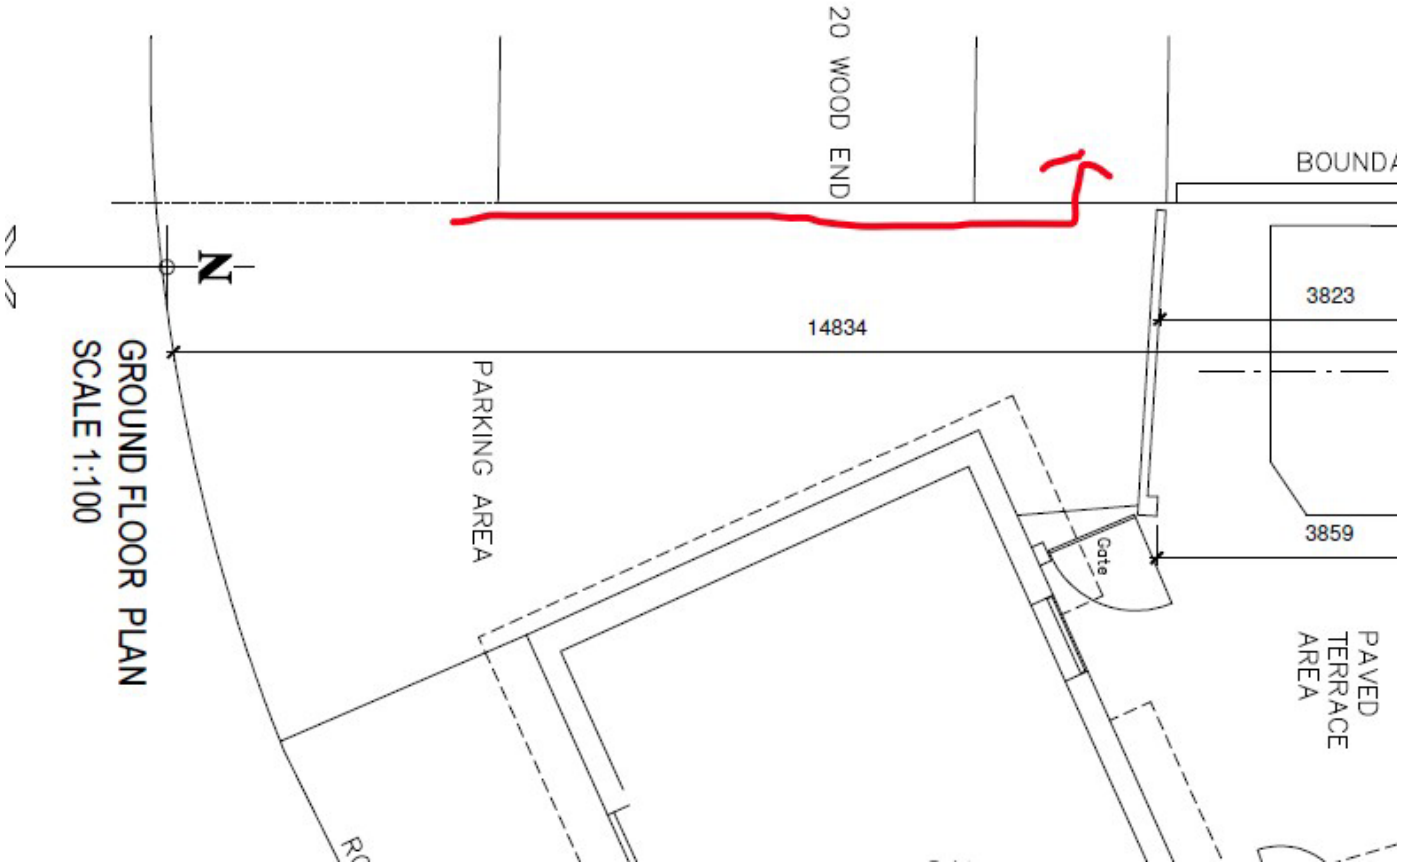
Thank you for taking these concerns into consideration as part of the planning review process.



Yours faithfully,

[redacted]
