LPA Ref:25/00069/ful

To whom this may concern,

I am writing in support of the secure storage facility located at The Barn, Overcote lane Needingworth.

There are so few secure storage areas in the local area, if the Overcote lane site was not available it would increase journey times and cause more congestion on the already overcrowded roads in St Ives, Huntingdon, Fenstanton and beyond.

The site provides many local businesses and private individuals a very affordable storage solution that is normally only available in town and on industrial estates. This I feel is why the facility has been so popular and there has been a need for additional containers to meet the needs of local people not wanting to travel to somewhere like Huntingdon or Cambridge.

This is a very well managed facility and provides a very valuable local service with little or no impact on the local area, allowing easy access and cutting down the need to travel long distances, reducing the carbon footprint of local business.

Yours sincerely.
