Dear Seren

Site Address: GH Display, Bullock Road, Washingley, PETERBOROUGH PE7 3SJ

I am writing to you on behalf of Eastern Power Networks plc the licensed distributor of electricity for the above address, trading as and referred to in this letter as "UK Power Networks". Thank you for your recent enquiry regarding an increased capacity at the above site.

No physical work required

I am pleased to confirm that UK Power Networks is able to provide the Premises with an Import Capacity of Existing kVA and an Export Capacity of 55 kVA without UK Power Networks having to carry out any construction or electrical works.

Further to our investigations I can confirm that there is no requirement to upgrade any measurement current transformers (CTs) owned by us, that are connected to your supplier's electricity meter and relied upon for accurate metering.

For avoidance of doubt, this proposed 55.0kva PV Generator together with a 5kva Battery Storage Device can be connected to run in parallel with our system subject to the export being restricted to a maximum of 55.0kva. The equipment should be fitted with G99 / G100 Type Tested Invertors / Equipment and therefore UKPN will waiver its right to Witness Test the Installation.

NOTE
This offer is conditional on the Transformer Upgrade Works 8500199014 being completed. Should this not be the case then the export will need to be restricted to 50kw.

Terms and conditions

This letter and the terms and conditions set out in the attached Acceptance Form comprise the Notice for the purposes of section 16A(5) of the Electricity Act 1989 ("the Notice").

What you must do next

If you would like UK Power Networks to increase the capacity based on the terms stated in this Notice, you must:

- Ensure that we have received your signed Acceptance Form below by 5pm on 20 May 2023
- Contact your electricity supplier to establish whether any alteration to your metering equipment is required **before** you are able to **safely** use any of the increased capacity (any alterations that are required to the metering equipment must be carried out by your electricity supplier)

Binding obligation

Please note that you have no entitlement to the increase in capacities set out in this Notice unless we receive your signed Acceptance Form as requested. Importantly, a binding obligation is created between us once UK Power Networks has counter-signed and dated the Acceptance Form, and returned it to you.

Interactivity

We have not received a request from any other customer for a connection to the same part of our Distribution System as you. To find out how this may affect your application if we do, please click here.

Commissioning documents

I can confirm that UK Power Networks has waived its right to conduct witness testing of this installation subject to you ensuring that:

- All equipment is of a type tested nature and
- The installation conforms with ENA Engineering Recommendation G99 – Requirements for the connection of generation equipment in parallel with public electrical distribution networks.

As outlined in G99, when the installation has not been witnessed, it is imperative that you send us the relevant commissioning documents for the generator no more than 28 days after the successful commissioning. If we do not receive the commissioning documents within 12 months of your acceptance of a quote then UK Power Networks will assume that this generator will not be connected in parallel with the UK Power Networks electrical distribution network and the quote will be withdrawn, after which you will have to re-apply. In this eventuality, your supply agreement capacity will not be upgraded.

Follow-up call

We will contact you within the next few days to discuss this Notice.

We are always looking to improve our service offering and as such, we may record any follow up calls for training purposes. We will not share the recorded call with anyone outside of our connections business and we will delete the recording as soon as we have completed the training review. However, if you do not want us to record the call please let us know at the beginning of the call.

Any Questions?

If you have any questions about this Quote or need more information, please do not hesitate to contact me.

If you are unhappy with our service, please follow our Complaints Procedure specific to commercial and industrial projects, which can be found here. This document details your right to contact Ofgem for a formal determination if we have been unable to resolve the matter to your satisfaction.

Yours sincerely

A N White

Premises Export MPAN(s) (if applicable) **:**	N/A
Premises Address :	Bullock Road / PETERBOROUGH PE7 3SJ
Customer Name :	GH Display

Acceptance

I confirm that I accept this Notice to provide the above stated capacities in accordance with the Terms and Conditions below.

Terms and Conditions:

- I understand and accept that use of system charges, in particular capacity related charges, are levied by Eastern Power Networks plc to my electricity supplier and they may become payable by me to my electricity supplier as a consequence of me entering into a contract for the above stated capacities.
- I understand that where there is no existing bilateral connection agreement in respect of the Premises between myself and Eastern Power Networks plc I am bound by the National Terms of Connection available by internet at www.connectionterms.co.uk or on request in writing to Energy Networks Association, 6th Floor, Dean Bradley House, 52 Horseferry Road, London SW1P 2AF
- I understand that where a connection agreement exists in respect of the Premises between myself and Eastern Power Networks plc that the terms of such agreement shall by this Notice be varied to the extent necessary so that the capacities stated above shall be incorporated into the agreement and additional use of system charges may become payable with effect from the date due as a consequence of the increased capacity but otherwise the terms included in such agreement shall remain in full force and effect.
- I agree that Eastern Power Networks plc shall, on the application of any person purporting to be an owner and/or occupier (or prospective owner and/or occupier) of the Connected Premises, be entitled to disclose to such person the fact that this Agreement contains terms which differ from the terms set out in the National Terms of Connection (www.connectionterms.co.uk).

- I shall, prior to selling or leasing my interest in the Connected Premises (or otherwise permitting a third party to occupy the Connected Premises), ensure that the existence and provisions of this Agreement are brought to the attention of such third party. For information, any such third party should note that it may automatically be bound by the provisions of this Agreement in accordance with the National Terms of Connection (www.connectionterms.co.uk).
