5th November 2024

Dear Sir/Madam,

Further to our previous communication, please see enclosed 2 x applications for works on protected trees on our small residential estate, Fairmead Park in Upwood.

Myself and my co-director have recently taken over management of the estate and as residents also, we know that sadly there has been very little (if any) maintenance to the trees in the last 10 years or so.

Our sole aim is to keep the trees in good and safe order, but sadly there are currently some areas as listed that need some fairly immediate attention - primarily for the safety of vehicles and persons passing under or next to the trees.

We would be very pleased if you might wish to meet on site at any time to assess / discuss the works proposed. Being of a park nature, the trees are a great asset to the estate and we wish to maintain them in good health for the safe enjoyment of all.

For any works that are authorised, we are likely to use another of our fellow residents, DH Tree Services whose report forms an integral part of our applications. David is a qualified Arborialist.

Yours sincerely,

[redacted]

Graham Hillman
Director – Upwood Estate Management Co. Ltd
