2 Green End St Ives PE27 5RH. TPO (8226-Hart)

Identification of Trees and proposed work:

T1 Oak: crown lift over garden to 6m
Reason: to improve light levels in garden

G1-11 Oak: remove dead wood throughout crown
Reason: reduce the likelihood of dead wood falling

G3-Line of Cherry Plum and Elm trees overhanging side of garden on Ramsey Road:
crown lift to 5m to clear shed roof
Reason: to reduce likelihood of damage to neighbouring building

G1-4 Horse Chestnut: reduce branch growing into Lime tree by 2.5m
Reason: to improve long term shape of Lime tree

T3 Elm tree close to Ramsey Road: reduce 2m laterally away from neighbouring property
Reason: to reduce likelihood of damage to neighbouring building

G2-10 Sycamore: fell close to ground level
Replace with 2m high tree (e.g. Beech) to replace felled Sycamore
Reason: to replace poor quality tree with good specimen

G2-3 Oak and 4 Hornbeam:
Remove dead wood over pub car park
reduce 1.5m laterally over pub car park
Reason: reduce the likelihood of dead wood falling on pub grounds, and live growth encroaching on pub outbuilding
