Subject: Scoping Consultation re: the Grafham to Cambridge Pipeline Scheme

Thank you for including Huntingdonshire Ramblers in this consultation.

At this stage, it is difficult to assess the impact on the affected Rights of Way until this project progresses further. Our default position is that we would wish to keep any path closures as brief as possible and provide alternative routes during the period of construction. Paths and surroundings should then be restored to their current state.

I should be grateful if you would continue to keep our Group informed of developments.

Kim
