1 ALBERTA CRESCENT, HUNTINGDON PE29 1TL

Proposed two storey side extension.

DESIGN STATEMENT

The original brick built semi - detached houses in the cud -sac date back to the 1950's if not earlier.

The proposed design of the extension strives to incorporate the original concept, but is subservient to the original dwelling.

The resulting internal design offers sufficient room for a growing and maturing family to be accommodated. The design also allows the family to easily incorporate accessible facilities as the family matures, into a multigenerational home.

There is sufficient car parking and access at the front of the dwelling to allow for this to happen.
