Hi Karen,

Please also find enclosed my evaluation of the trees at your Huntingdon office.
A basic map is enclosed.

T1 small dead tree which needs to be felled.

T4 Yew tree is now growing over next doors building.

T6 Elder
This could be cut back from the car park.

T13 Elder
This is leaning towards the cars. It should be felled.

T17 London Plane
Decay Visible at the base . The rest of the tree seems in good health. There is large dead wood over the car park which needs to be removed before it falls on a car.

T19 Chestnut
Large cavities in the main stems and the trunk has a large hole in it. You can see from the images. This needs at least a re-pollard to take the weight off of it. The large stems head towards the building and the car park behind the wall. I would say this is the most urgent work to be carried out.

Kind Regards
Sam Levitt
