25/80073/COND|Discharge of Condition 4 (Archaeology) for 24/00228/HHFUL|17 School Lane Eaton Socon St Neots PE19 8GW

Dear Marie,

Thank you for the consultation with regards to the discharge of the archaeological condition. We have reviewed the WSI which was also sent directly to this office for review and we had a number of comments including that the worked recommended should consist of Archaeological Monitoring and Recording not Watching brief. I have sent comments directly to the archaeological contractor and they have made amendments. We recommend that based on the document provided here the condition should be retained. However if the applicant provides the updated version of the WSI we would support discharge of the re-commencement element to allow progression of the works including the archaeological programe, with parts C and D of the condition retained to secure the implementation of the work and post excavation program and reporting.

Hope this is clear, please let me know if you need anything further.

Kind regards
Lu
