TREE PROTECTION NOTES. All trees, hedges and hedgerows on and adjacent to the site are retained. None is to be felled, uprooted, lopped, topped, pruned, reduced or have its roots severed. Root protection areas are plotted from stem positions in accordance with BS5837:2012, as shown in the legend. Protective fencing to BS5837:2012 is to be erected on the line shown before any equipment, machinery or materials are brought onto the site, and retained throughout construction. The area enclosed is a construction exclusion zone: no storage of materials, plant, spoil, fuel or chemicals; no site huts; no mixing; no access route; no fires; no change in ground level; no excavation other than by hand or trenchless methods. Where the foul rising main passes within a root protection area it is to be installed by moling or hand excavation with root retention

- Boundary
- Proposed New Dwelling
- Gravel Drive
- Tree Root Protection zone
- Tree Protection fence witin the boundary
- 1mx2mx1.5m soak away with crates
- Sewage pumping station
- Sewage pipe route

NOTES

1. No deviation may be made from the details shown on this drawing without prior permission of the architects. Any discrepancy found between the drawing and any other document should be referred immediately to the architects. IF IN DOUBT ASK.
2. No dimension should be scaled from this drawing.
3. This drawing is to be removed from currency immediately a revised version is issued.
4. The contractor must check the existing construction on the site prior to the commencement of the works.
5. All rights described in chapter IV of the Copyright, Designs and Patents Act of 1988 have been generally asserted.
