Subject: 25/00928/FUL - objection from occupants of 44 Falcon Drive

Further to the proposal in relation to the change of use of land on behalf of 30 Hawk Drive, Hartford, Huntingdon; I'd like to register my strong objection to this proposal on the grounds of noise, "disturbance from use" and smells.

As you may already be aware, there has been previous use of the shed in question to run a rodent breeding business. This led to both repugnant smells and late night disturbance over a sustained period of time as the occupants literally went about their business.

The smell became so unbearable, and their response to complaints so unreasonable, that Environmental Health became involved and after a prolonged investigation proceeded to issue an Abatement Notice. At that time (October 2021) I was advised that the Environmental Health Department would be likely to strongly object to planning permission being granted for this structure. I do hope that their input has been sought and due weight is given to past behaviour and the existence of the Abatement Notice.

Following the Abatement Notice, the occupants then took to keeping ducks and geese in the rear garden of 30 Hawk Drive. This was subsequently subject to noise complaints and is an ongoing issue.

There is a clear pattern of keeping unsuitable animals without any regard to neighbours and I believe this proposal could lead to more of the same, with attendant noise, smell and vermin issues.
