Description of the Proposal

Please provide a description of the approved development as shown on the decision letter

Proposal: Refurbishment and extension of existing community building and town council offices to include demolition of existing single storey extension and replacement two-storey extension with screened plant at roof level, first floor extensions to east and west elevations, glazed dormer window to east elevation, creation of external ramps and steps, canopies over entrances, glazed ground floor link extension on west elevation, installation of solar panels, replacement chimney, new balcony to west elevation, alterations to balustrade on riverside and replacement fenestration and doors.

(Condition 15) No development, including preparatory works, shall commence until details of measures indicating how additional surface water run-off from the site will be avoided during the construction works have been submitted to and approved in writing by the Local Planning Authority. The applicant may be required to provide collection, balancing and/or settlement systems for these flows. The approved measures and systems shall be brought into operation before any works to create buildings or hard surfaces commence.

Reason: To ensure surface water is managed appropriately during the construction phase of the development, so as not to increase the flood risk to adjacent land/properties or occupied properties within the development itself; recognising that initial works to prepare the site could bring about unacceptable impacts in accordance with Policies LP5 and LP15 of the Huntingdonshire Local Plan to 2036.

Reference number

24/00515/HDC

Date of decision (date must be pre-application submission)

25/09/2024

Please state the condition number(s) to which this application relates

Condition number(s)

Condition 15

Has the development already started?

◯ Yes
⊘ No

Part Discharge of Conditions

Are you seeking to discharge only part of a condition?

◯ Yes
⊘ No

Discharge of Conditions

Please provide a full description and/or list of the materials/details that are being submitted for approval

Condition 15:
As advised by the LLFA, information detailing proposed mitigation measures ensuring surface water runoff is managed during the construction phase can be found within Section 4 of documents 'CSWMP Rev A - plus Appendices A-E' and 'CSWMP Rev A- plus Appendices F-H'

Site Visit

Can the site be seen from a public road, public footpath, bridleway or other public land?

⊘ Yes
◯ No

If the planning authority needs to make an appointment to carry out a site visit, whom should they contact?

⊘ The agent
◯ The applicant
◯ Other person

Pre-application Advice

Has assistance or prior advice been sought from the local authority about this application?

⊘ Yes
◯ No

If Yes, please complete the following information about the advice you were given (this will help the authority to deal with this application more efficiently):

Officer name:

Title

First Name

***** REDACTED ******

Surname

***** REDACTED ******

Reference

Date (must be pre-application submission)

06/11/2024

Details of the pre-application advice received

Further input requested on submission material required against Condition 15. Advice outlined a response on the following points:

"In regard to condition 15 we would expect the following information:

Information detailing proposed mitigation measures ensuring surface water runoff can be managed during the construction phase. This should include but is not limited to temporary storage structures, discharge points, flow controls, and water quality control measures;
Maintenance schedules and inspection frequencies for proposed mitigation measures;
Confirmation of who will be responsible for the management and maintenance of any temporary controls;
Commentary on phasing confirming adequate permanent drainage infrastructure will be in place to accept flows from impermeable areas to ensure no increase in flood risk during the construction period;
Incident Action Plans outlining control measures to manage pollution incidents and ensure no detriment to water quality leaving the site;
Location of any temporary hard surfacing and how these areas will drain and be managed

Where the proposal does not seek to increase impermeable area and retain the existing drainage system we would focus on the water quality control measures ensuring no detriment to water quality and no increased risk of blockage of the existing system during the construction phase."

Responses have been addressed on page 4 of the document "CSWMP Rev A - plus Appendices A-E"

Declaration

I/We hereby apply for Approval of details reserved by a condition (discharge) as described in the questions answered, details provided, and the accompanying plans/drawings and additional information.
I/We confirm that, to the best of my/our knowledge, any facts stated are true and accurate and any opinions given are the genuine opinions of the person(s) giving them.
I/We also accept that, in accordance with the Planning Portal's terms and conditions:
- Once submitted, this information will be made available to the Local Planning Authority and, once validated by them, be published as part of a public register and on the authority's website;
- Our system will automatically generate and send you emails in regard to the submission of this application.

☑ I / We agree to the outlined declaration

Signed

AOC Architecture

Date

16/12/2024

Amendments Summary

Amendment made to reflect submission of condition discharge against Condition 15 only. Prior submission included description against items 20 & 21, have been removed under the guidance note that these are notes to applicant.
