Dear Sirs

I wish to apply for planning permission on two trees in my garden, this work is remedial.

Enclosed is a plan of the garden which includes the position of said tress one being a Bay and the other a Acacia tree particularly this tree is causing some aggravation with the neighbours at number 5 Station Lane (I have enclosed there last letter) I agree the tree does need reducing). By possibly a third but I want to retain it. The same with the Bay.

Also enclosed photos of tress along with rough plan of street and position of tress and the Neighbours letter.

I looking forward to your earlier response.
