ANPR PLAN

Further to our recent meeting – please find a revised plan showing proposed ANPR camera points – whilst these show the cameras in the middle of the road, they are to be installed on lamppost columns on either side of the roadway approx. 10m back from the RED *read* line shown.

The location of camera 1 has be changed to include the whole roadway, including vehicles entering into Godwin House (GH) these will be excluded from enforcement with an exemption list managed internally by GH.

Previously suggested locations for camera 1 resulted in the majority of the roadway being unmonitored and the camera only covering a small dead-end section.
