Huntingdonshire District Council in pursuance of powers under the above Act, hereby **REFUSE TO GRANT CONSENT** to carry out the following work:

Proposal: T1 Ash- Crown reduction by 3m -Maintain size in close proximity to houses.

Site address: 74 Blenheim Way Yaxley Peterborough PE7 3WF

Applicant: Tully

Application Reference: 24/02036/TREE

In accordance with your application received on 4th November 2024 and the plans, drawings and documents which form part of the application subject to the following reason/s.

1. Reason: The proposed crown reduction is not considered to be in line with sound Arboricultural practice. Any pruning to a tree needs justification - a crown reduction, more than most other operations, can result in a radical change in the form of the tree with long term consequences, so there needs to be sound reasoning to carry out what is a fairly drastic and costly operation. A crown reduction on a healthy tree typically results in increased vigour which in return can congest the crown and create more problems later as this new growth is weakly attached and therefore more prone to failure. Crown reductions on healthy trees will only be a short term solution and long term will involve more expense on further necessary reductions to reduce this risk of failure. In essence, reductions tend to result in a bushier, denser crown within 2-3 years that will require regular reductions thereafter to prevent failure.
