Subject: Planing Application 26/01908/HHFUL No 41 High Street
Date: 11 November 2026 14:10:15
Importance: High

Good morning,

The planning portal is displaying errors whilst trying to submit the below response:

Hemingford Grey Parish Council:

The Hemingford Grey Parish Council does not support this planning application due to concern about two items:

1) The Design, Access and Heritage Statement states that replacing the false front door with a small window will have no effect on the contribution of the front of the house to the conservation area. The Parish Council does not agree with this statement, and has concern about a negative impact this change might have on the conservation area. Other terraces of this size in the High Street face the street with a ground floor door and window, and this pattern is repeated along the High Street.

2) The mention of the complete removal of the existing gate, surround and supports in the Statement does not address whether they are attached to the adjoining Grade II listed No. 39, or whether their removal would require any work on this Grade II listed building to make do any damage to it's surface covering.

The Parish Council does support all other aspects of the planning application, and thanks the applicant for their detailed submission.
