Hi Hannah

Planning Ref: 24/02095/NMA
Env Health Ref: 402034

RAF Upwood Ramsey Road Bury Huntingdon PE26 2RA
Non-material amendment of 21/01420/S73 to reword Condition 6 to refer to revised Written Scheme of Investigation and rewording of Condition 17 to remove reference to BWB Remediation Report to include reference to new report prepared by Georisk Management.

There's been a delay in our admin on this one and I received a request to make a comment the day after I'd already made one.

Just to summarise, the Remediation Method Statement and Validation Plan is acceptable, but it doesn't deal with the whole application site. It basically misses out the contaminated areas. These must of course be dealt at some point before the condition is discharged.

Let me know if you want me to resend my original comment of 27 May 2025.

Thanks,
Aaron
